| GALLERY_001  | Header                                       | Verify that the header has email and phone number.                   | n/a        | User should be on [gallery] page. | 1. See if the header contains email and phone number.                                           | 1. Email and phone number should be visible.                                                                                                                  | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_002  | Responsiveness                               | Verify that the UI supports dimension of [iPhone XR].                | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_003  | Responsiveness                               | Verify that the UI supports dimension of [iPhone 12 Pro Max].        | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_004  | Responsiveness                               | Verify that the UI supports dimension of [iPhone 14 Pro Max].        | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_005  | Responsiveness                               | Verify that the UI supports dimension of [Pixel 7].                  | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_006  | Responsiveness                               | Verify that the UI supports dimension of [Samsung Galaxy S8+].       | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_007  | Responsiveness                               | Verify that the UI supports dimension of [Samsung Galaxy S20 Ultra]. | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_008  | Responsiveness                               | Verify that the UI supports dimension of [iPad Mini].                | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_009  | Responsiveness                               | Verify that the UI supports dimension of [iPad Air].                 | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. As expected.                  | Pass   |                   | UI         | No         |
| GALLERY_010  | Responsiveness                               | Verify that the UI supports dimension of [iPad Pro].                 | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. UI is not responsive.         | Fail   | Report submitted  | UI         | No         |
| GALLERY_011  | Responsiveness                               | Verify that the UI supports dimension of [Surface Pro 7].            | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. UI is not responsive.         | Pass   |                   | UI         | No         |
| GALLERY_012  | Responsiveness                               | Verify that the UI supports dimension of [Surface Duo].              | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. UI is not responsive.         | Pass   |                   | UI         | No         |
| GALLERY_013  | Responsiveness                               | Verify that the UI supports dimension of [Galaxy Z Fold 5].          | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. UI is not responsive.         | Pass   |                   | UI         | No         |
| GALLERY_014  | Responsiveness                               | Verify that the UI supports dimension of [Asus Zenbook Fold].        | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. UI is not responsive.         | Pass   |                   | UI         | No         |
| GALLERY_015  | Responsiveness                               | Verify that the UI supports dimension of [Samsung Galaxy A51/71].    | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. UI is not responsive.         | Pass   |                   | UI         | No         |
| GALLERY_016  | Responsiveness                               | Verify that the UI supports dimension of [Nest Hub].                 | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. Content overflow in navbar.   | Fail   | Report submitted. | UI         | No         |
| GALLERY_017  | Responsiveness                               | Verify that the UI supports dimension of [Nest Hub Max].             | n/a        | User should be on [gallery] page. | 1. Access [gallery] page from the described device.                                             | 1. There should not be any cropped components.<br>2. There should not be any unusual content overflows.<br>3. Components should be properly centered/aligned. | 1. Unusual right margin appears. | Fail   | Report submitted. | UI         | No         |
| GALLERY_018  | [Moments of Care] section                    | Verify that the filters gallery filters are working.                 | n/a        | User should be on [gallery] page. | 1. Click on [All], [Care Moments], [Companionship], [Our Team] and [Daily Care] filter buttons. | 1. The images in gallery should update according to the filter.<br>2. Updated gallery of pictures should accurately reflect the applied filter.               | As expected.                     | Pass   |                   | Functional | No         |
| GALLERY_019  | [Experience Our Compassionate Care] section. | Verify that the [Get Started Today] button works.                    | n/a        | User should be on [gallery] page. | 1. Click on the [Get Started Today] button.                                                     | 1. User should be redirected to [appointment] page.                                                                                                           | As expected.                     | Pass   |                   | Functional | No         |
